PRODUCT DESCRIPTION

The PLANET UMG-1000 is a cost effective total IT solution for the small and medium business (SMB). It integrates commonly used office appliance features and provides Internet access, telephone, fax, data, and print services in one device. Built into the 4-Port FXO that allows you to connect to various Internet and telephone carriers.

Branch-to-Branch secured network and call features bring your remote offices together. The UMG-1000 facilitates sharing files safely between multiple office locations through secure channels. For VoIP functions, the users can call any extension from any remote location without paying local or long distance charge. Smart Wizard automatically adjusts your configuration and guides you through initial setup. The administrator can easily manage user accounts with privilege and access control. In the storage feature, the storage volumes can be created for individual users and groups within the corporate. The UMG-1000 is also as the Web and E-mail servers that are able to be set up with one mouse click. It provides schedule automated snapshot and backup tasks to prevent data loss. Besides the above functions, the extensive features include DMZ support, VoIP call control and Call Detail Record (CDR), Least Cost Routing (LCR), Busy Lamp Field (BLF), and Bridged Line Appearance (BLA), configuration backup and restore, secure remote management capabilities and many more.
